EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Anthony Hahn on 04/22/09.

The application has been amended as follows:

Cancel claims 30, 32-39.

Claim 13:

A system for providing content to a browser, the system comprising:

[a first content portion, wherein the first content portion originates from a first domain that is remote relative to a user;

a second content portion, wherein the second content portion originates from a second domain that is remote relative to the user;]

a processor, said processor comprising means for:

receiving a request for end-user support, wherein the request is received

at a support location that is remote relative to the end-user;

determining a present navigation location for the end-user;

retrieving content from a content provider that corresponds to the

determined present navigation location, wherein the content is retrieved

from a content location that is remote relative to the end-user, wherein

the retrieved content includes an embedded navigation link associated with a first domain, wherein the first domain is remote relative to the end-user, wherein the first domain is associated with the content location; encoding the present navigation location; encoding the embedded navigation link so that it appears to be associated with a second domain, wherein the second domain is remote relative to the end-user, wherein the second domain is associated with the support location;

an automated support system;

an annotation server in communication with the automated support system, wherein the annotation server is configured to encode either the first content portion or the second content portion to create an appearance to the user that both content portions originated from a common domain that is remote relative to the user without actually changing the origin of the first content portion or the second content portion; wherein said annotation server comprising means for:

replacing the embedded navigation link included in the retrieved content with the encoding of the embedded navigation link; providing a modified content to the end-user, wherein the modified content includes a portion of the retrieved content and includes the encoding of the embedded navigation link that replaced the embedded navigation link, wherein the encoded embedded navigation link continues to be actually associated with the first domain despite the

appearance that the encoded embedded navigation link is associated with the second domain; and
providing the end-user support to the end-user, wherein the end-user support is provided from the support location via the second domain.

Claim 20:

A method for displaying content in a browser window, the method comprising:
receiving data from a content provider associated with a first domain that is remote relative to a user, wherein the received data includes a plurality of embedded links;
identifying each of the plurality of embedded links;
receiving a request for end-user support, wherein the request is received at a support location that is remote relative to the end-user;
determining a present navigation location for the end-user;
retrieving content from a content provider that corresponds to the determined present navigation location, wherein the content is retrieved from a content location that is remote relative to the end-user, wherein the retrieved content includes an embedded navigation link associated with a first domain, wherein the first domain is remote relative to the end-user, wherein the first domain is associated with the content location;
encoding a first of the plurality of embedded links to create an appearance that the first of the plurality of embedded links is associated with a second domain

that is remote relative to the user while maintaining an actual association between the encoded embedded link and the first domain;

encoding the present navigation location;

encoding the embedded navigation link so that it appears to be associated with a second domain, wherein the second domain is remote relative to the end-user, wherein the second domain is associated with the support location; and

providing for display in the browser window at least a representation of at least a portion of the received data, wherein the first of the plurality of embedded links is encoded responsive to the first of the plurality of link_being associated with the first domain.

Claim 25:

A method for displaying content in a browser window, the method comprising: receiving data from a content provider, wherein the received data includes a plurality of embedded links associated with a first domain that is remote relative to a user;

identifying each of the plurality of embedded links;

receiving a request for end-user support, wherein the request is received at a support location that is remote relative to the end-user;

determining a present navigation location for the end-user;

retrieving content from a content provider that corresponds to the determined present navigation location, wherein the content is retrieved from a content location that is remote relative to the end-user, wherein the retrieved content

includes an embedded navigation link associated with a first domain, wherein the first domain is remote relative to the end-user, wherein the first domain is associated with the content location;

encoding a first of the plurality of embedded links to create an appearance that the first of the plurality of embedded links is associated with a second domain that is remote relative to the user, wherein the encoded link continues to actually point to a location in the first domain despite the encoding;

encoding the present navigation location;

encoding the embedded navigation link so that it appears to be associated with a second domain, wherein the second domain is remote relative to the end-user, wherein the second domain is associated with the support location;

providing for display in the browser window at least a representation of at least a portion of the received data; and wherein the first of the plurality of embedded links is encoded responsive to the first of the plurality of links being associated with the first domain.

The following is an examiner's statement of reasons for allowance:

The following is an examiner's statement of reasons for allowance:

Independent claims 1, 13, 20 and 25, when considered as a whole, are allowable over the prior arts of record. Specifically, prior arts of record do not teach or suggest the combination of means, arranged and interacted to perform the step of operating a browser associated with an end user. Specifically,

although Szabo teaches the first content portion, wherein the first content portion originates from a first domain that is remote relative to a user; and a second content portion, wherein the second content portion originates from a second domain that is remote relative to the user.

However, none of the references teach or suggest the feature of encoding a first of the plurality of embedded links to create an appearance that the first of the plurality of embedded links is associated with a second domain that is remote relative to the user while maintaining an actual association between the encoded embedded link and the first domain;

With such limitations, the Examiner deems this application in condition for allowance over the prior arts made of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mylinh Tran. The examiner can normally be reached on Mon - Thu from 7:00AM to 3:00PM at 571-272-4141.
